

PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in Python development, AWS Cloud services, and cybersecurity fundamentals. Experienced in building serverless applications, implementing secure coding practices, and developing REST APIs. Seeking an internship or junior software/cloud role to contribute to scalable, secure solutions while continuously enhancing technical expertise.

EDUCATION

Sri Venkateshwara college of Engineering Tirupati

Computer Science and Engineering (Cyber Security)
2023 - Present CGPA-8.34

Government Polytechnic Dharmavaram Dharmavaram

Computer Engineering
2020 - 2023 Percentage-78.65

SKILLS

TECHNICAL SKILLS

- Programming Languages: Python, C, C++, Java
- Web Technologies: HTML, CSS, JavaScript
- Cloud & DevOps: AWS (EC2, S3, Lambda, DynamoDB, API Gateway), Serverless Architecture, IAM (basic)
- Databases: SQL
- Cybersecurity: Secure Coding Practices, Authentication & Authorization, Data Encryption, OWASP basics
- Concepts: REST APIs, SDLC, Debugging, Problem Solving, Data Structures (basic)

PROFESSIONAL SKILLS

- Communication: Technical documentation and clear verbal communication
- Presentation Skills: Technical presentations and project demonstrations
- Leadership: Team coordination, task planning, and peer collaboration

TOOLS & PLATFORMS

- Git, GitHub, AWS Management Console, VS Code, Linux (basic), Windows, Arduino IDE

CERTIFICATIONS

- AWS Online Internship - APSSDC & Amazon Web Services (Jun-Jul 2024)
- AI Associate Certification - Salesforce (Apr 2025) | Credential ID: 6062722
- NPTEL - IoT, Cybersecurity & Safety

LANGUAGES

- English, Telugu, Hindi

TECHNICAL PROJECTS

AWS-Based Student Feedback System

- Built a serverless feedback system using AWS Lambda, API Gateway, DynamoDB, and S3.
- Designed RESTful APIs for secure data submission and retrieval.
- Implemented admin authentication and real-time feedback dashboard.
- Improved scalability and reduced infrastructure overhead using AWS serverless architecture.
- Tech: Python, AWS Lambda, API Gateway, DynamoDB, S3, HTML, CSS

Python-Based GUI Application for Cybersecurity

- Developed a GUI-based Python application to encrypt and securely store sensitive user data.
- Implemented file encryption and access control mechanisms, improving data confidentiality.
- Applied secure coding principles to prevent common vulnerabilities.
- Tech: Python, Tkinter, File Handling, Encryption

IoT Project: Authentication Device Using RFID

- Developed an RFID-based authentication system for access control simulation.
- Integrated RFID reader, buzzer, and laser modules for real-time authentication feedback.
- Strengthened understanding of hardware-based security systems.
- Tech: Arduino, C/C++, RFID Module, Embedded Systems

INTERNSHIP EXPERIENCE

Student Intern

Madhavi Info Tech | 2022-2023

- Developed Python-based applications with a focus on secure coding and reliability.
- Designed and implemented a cybersecurity-focused GUI application.
- Integrated data encryption techniques to protect sensitive information.
- Collaborated in an industrial training environment, following basic SDLC practices.
